KLYN'S DO-BLOOM Hybrid Perpetual Roses

This class requires less care than the Hybrid Teas and yields an abundance of flowers in June with scattering blooms in autumn. Nice in the shrubbery border or in the background of a bed of Hybrid Teas. The varieties listed below are the cream of their class, comprising a full range of color.

KLYN'S DO-BLOOM Hardy Climbing ROSES

Nothing is more beautiful than this class in full bloom in late spring or early summer, with some varieties repeating later in the season. On porches, arches, trellises, pillars, or along fences they present a most pleasing spectacle. They make a great screen for anything one wants to cover. For this purpose do not prune them at all, except to shorten the side shoots which have bloomed. If the plants become too large, remove a few of the new canes, as the old wood produces the flowers.

All Climbers, 75 cts. each, except where noted
